Latest projects

Flower Shop
A full stack flower shop website with a simple dashboard, and multilingual support (Persian and English). Built with Next.js and Django, featuring a responsive design and clean architecture.

https://github.com/KimiyaKhoshnood/FlowerShop

Micro Frontend Demo Project
Developed a micro frontend shoe store using Module Federation. The project has a Host and a Remote app, enabling runtime sharing of React components. UI built with Minimal UI components.

https://github.com/KimiyaKhoshnood/Micro-Minimal

Harava Company
I built a personal portfolio using Next.js and deployed it on Vercel. It features Server-Side Rendering.

https://harava.co/

Idea Speed Control
I developed a website with React, with a UI entirely designed by me.

Experience

Jun 10 - Aug 10 2024 Tehran - 2 mos
Manual QA intern
SD Studio

Worked with tech and product teams to test website quality, improving my teamwork and understanding of critical bugs. I now apply this knowledge to write more stable and efficient frontend code.

Oct 1 - Dec 1 2024 Tehran
Front-end developer
Freelance

Company Website: Designed and developed a full corporate website.
Dashboard for Authentication & Camera Management: Implemented dashboard features (authentication flow with JWT, CRUD operations, API integration).
3D Printing Order Platform: Built product 3D preview on web, integrated dynamic forms for order submission.

Apr 2025 - Now Tehran - 7 mos
Junior Front-end developer
Hazareh Sevom (HZ3)

https://hz3.co/
https://microtrend.ir/

Working on three major projects:
- A large-scale insurance platform with 10,000+ active agents and six different brands, featuring a dynamic architecture with custom form builders, panel builders, and dashboard generators. I'm primarily responsible for developing dynamic dashboards, writing unit tests using Jest, and documenting UI components with Storybook. This platform is currently being migrated to a Micro Frontend architecture using Webpack Module Federation, with plans to share UI components across other projects.
- An automated crypto trading platform, focused on smart execution.
- An AI-powered Instagram DM automation tool, currently under Meta's approval process, built within a Turborepo-based Monorepo setup.

Skills

Next Js | React Js | TypeScript | JavaScript

Redux | React Query | Micro Frontend | Jest | Storybook

- Material UI
- Ant Design
- Shadcn
- Perfect Pixel

- React Hook Form
- React Hooks
- React Router

Git | Rest API | Agile

Tailwind | Bootstrap | SASS | UI/UX | CSS | HTML
